Psychology of Interaction

Artifact : YouTube Music App

computer-based artifact

- The artifact is the YouTube Music app on a smartphone.
- The affordance of the app is choosing which song you want to listen to.
- The signifier for playing a song is the white triangle "Play" button next to each song or playlist.
- The feedback that the song is playing is the button changing to a "Pause" icon. If the song doesn't play, the button stays the same, and a message may appear saying, "Unable to play this song. Please check your internet connection or try again later."
